

The HealthRev Partners OASIS-E Crosswalk is based on guidance released by CMS and can serve as a starting point in familiarizing agencies and clinicians with the changes to the OASIS data set that will go in effect on January 1, 2023.

OASIS-E is one of the largest OASIS revisions to date, so it is vital that agencies choose a good partner that has both expertise and oversight experience.

At HealthRev Partners we are committed to providing accurate resources to agencies and clinicians as they try to make a seamless transition to the new OASIS-E data set.

Changes to the OASIS include:

- New sections & added items
- Different time point versions of some items
- Removal of some items
- Revision of some items
- Updated skip patterns

OASIS- E Crosswalk

Although many items will remain unchanged on OASIS-E, the landscape will look drastically different and will no longer consist of just “moo” items (M items) and GG items.

The attached Crosswalk outlines the 16 Sections of the OASIS-E as listed below. Not all items will appear on each time point/assessment type.

****Note there is no L or P Section**

There will be 16 “Sections” ranging from A to Q (No L or P)
****Not all items will appear on all OASIS assessment types**

A	Admin Info
