

New!

Preceptor Partnership

PARTNERS

HealthRev Partners provides either an 8 or 6 week program for newly hired or experienced clinicians. Certified RNs guide the program, offering OASIS documentation review and correction sessions to clinicians, ensuring accurate and compliant documentation. This program enhances clinician performance and fosters improved documentation practices.

8

New Hire LIVE OASIS

8 Week Program

Week 01-03

The enrolled clinician will meet with the preceptor to review any questions, give instruction and educate on EVERY OASIS completed.

Week 03-06

Progress will be reviewed at the end of Week 3. If appropriate the clinician will begin to receive 1:1 focused instruction and education as follows: 100% of OASIS completed in Week 4, 75% in Week 5, and 50% in Week 6.

Week 07-08

Progress will be reviewed at the end of Week 6. If appropriate, HRP will begin to review submitted OASIS for accuracy and compliance as follows: 100% of OASIS completed in Week 7, and 50% in Week 8.

6

LIVE OASIS Refresher

6 Week Program

Week 01-02

Clinician meets with HRP preceptor for instruction on prerequisite modules and 5 full OASIS assessments and preceptor reviews 100% of OASIS assessments to identify deficiencies in Week 2.

Week 03

50% of OASIS completed will be completed with LIVE tutoring, and 50% of OASIS completed will be reviewed to track progress.

Week 04-06

100% of OASIS completed in Week 4 will be reviewed, 75% in Week 5, and 50% in Week 6

8 NEW Hire OASIS Preceptor Program

Newly hired clinicians can ask questions and gain insight on the OASIS during any part of the preceptor partnership program.

Clinicians have confidence that they can efficiently and accurately fill out and review any part of the OASIS documentation.

New clinicians have knowledge on how their role and documentation impacts the overall health of the agency from admission to transfer/discharge, including publicly reported outcomes.

6 LIVE OASIS Refresher Preceptor Program

Experienced clinicians are professionally developed to be updated and informed on best practices for documentation efficiency and completion.

Clinicians are able to spend more time with patients rather than correcting insufficient documentation and encountering difficulties.

Tenured clinicians have gained a better understanding on how their role and documentation impacts the overall health of the agency from admission to transfer/discharge, including publicly reported outcomes.
